SMP Parts in global partnership with Volvo CE

SMP Parts Tiltrotators is compatible with the new Volvo EC250E and EC300E*

By being in the leading edge of technology in the industry, Volvo now introduces the Volvo EC250E and EC300E, which are the first ones to be equipped with the new Smart Connect.

Smart Connect enables communication between the machine and the Tiltrotator. When the Tiltrotator is connected to the machine, all functionality and technical data is communicated to the machine through Smart Connect. SMP Tiltrotators are compatible with the new facelift of Volvo EC250E and Volvo EC300E*.

This solution is a result of a collaboration between Volvo CE, SMP Parts and SVAB hydraulik AB.

- The new platform is exciting and brings the best what you can get today on the excavator market. Certain solutions, as the Smart Connect solution that allows different brands of TiltRotator to integrate seamlessly in our machine and DigAssist, are unique and bring significant customer value." says Kurt Deleu, Head of excavator product management EU/INT, Volvo CE

Through Volvo CE's platform DigAssist, there is a Factory Fit solution prepared for SMP:s Tiltrotators. The Factory-fitted preparation system is time saving and provides more precision and makes it possible to control both the excavator and the tiltrotator using the original joysticks, with the information presented on the main display.

- It's great that we can accomplish this together. Volvo is in the lead of the technical development and we develop our products trying to keep up with the pace. This makes SMP a perfect partner for manufacturers, dealers and end customers. With this collaboration, we can offer a Plug n' Play-solution meeting both Volvo's and the customer's needs. For Volvo's new machine models SMP has created new functionalities and user interface which makes it easy and efficient to operate the machine with its work tools. First in line we have the EC250E and EC300E, followed by several other models during 2021.

We are excited about this collaboration and the development of sales during 2021 and years to come, says Daniel Persson, Sales Manager, SMP Parts AB.

**More models to be release in 2021.*
